Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date | 11 November 2022 |
|---------------|--|
| Team ID | PNT2022TMID35064 |
| Project Name | Visualizing and Predicting Heart Diseases with |
| | an |
| | Interactive Dash Board |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional | Sub Requirement (Story / Sub-Task) |
|--------|-------------------|--|
| | Requirement(Epic) | |
| FR-1 | User Registration | Enables user to make registration for theapplication through Gmail |
| FR-2 | User Confirmation | Once after registration, the user will get confirmationvia Email |
| FR-3 | Visualizing Data | User can visualize the trends on the heart disease through Dashboard created using IBMCognos Analytics |
| FR-4 | Generating Report | User can view his/her health report and canmake decisions accordingly |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| NFR No. | Non-Functional Requirement | Description |
|---------|----------------------------|---|
| NFR-1 | Usability | The application will have a simple and |
| | | user-friendly graphical interface. Users |
| | | will be able to understand and use all |
| | | the features ofthe application easily. |
| | | Any action has to be performed with just |
| | | a few clicks |
| NFR-2 | Security | For security of the application the |
| | | techniqueknown as database |
| | | replication should be used |
| | | so that all the important data should be kept safe. |
| | | Incase of crash, the system should be |
| | | ableto backup and recover the data |
| NFR-3 | Reliability | The application has to be consistent at |
| | | everyscenario and has to work without |
| | | failure in any environment |

| NFR-4 | Performance | Performance of the application depends on the response time and the speed of the data submission. The response time of the applicationis direct and faster which depends on the efficiency of implemented algorithm |
|-------|--------------|---|
| NFR-5 | Availability | The application has to be available 24 x 7 forusers without any interruption |
| NFR-6 | Scalability | The application can withstand the increase in theno. of users and has to be able to develop Higher versions |
